**Tour:
Trawler under
construction**

For years Karstensen's
shipyard in Skagen has
used marine filters of all
shapes and sizes from
BMJ

Central in the jumble of pipes and valves, you are likely to find a robust and maintenance-friendly filter from BMJ

For non-standard ship construction with scanty installation areas, it may be necessary to order special customized filters.

BMJ are used to solving such problems, and are eager to help with advice and instruction.

Experienced workers are our greatest resource.

Competent staff ensure that BMJ deliver only products of paramount quality.

BMJ employ engineers, technicians, smiths, welders (with certificate), and machinists.

With these assets, we resolve numerous in a very fluctuating market.

Pre-delivery quality control

Poul Pinholt, the owner of BMJ, busy with the final quality control of a batch of marine filters before they are despatched to the customer.

BMJ are often involved from start to finish; from idea to design, development and production.

Here are two DN 400 filters, shot-blasted, epoxy painted internally and with external primer.

Simple and effective reordering

All marine filters from BMJ are labelled with a unique number, which makes reordering easy and safe. This number can also be used to order filter inserts. Inserts are normally available as hot galvanised or acid proof.

BMJ as sub-supplier:

- **CNC turning**
- **Bar - chuck work**
- **All steel and metal work**
- **Extensive plastic material know-how**

Let BMJ manage your jobs for you

- both large and small

- Turning
